

## HOW TO OPERATE YOUR UNDERCOUNTER DISHWASHER

The word **FIL** will scroll across the display during the fill and heat process.

When complete, a temperature will display in the screen

Press the on/off switch once.

Open the door. Place the rack of items to be washed in the unit. Close the door.

Press a button for the wash cycle you need. 1st cycle for glasses or 2nd cycle for dishes. When complete, the word **End** will appear and the unit will beep.

## HOW TO RUN A CLEAN CYCLE, TAKE APART AND CLEAN YOUR UNDERCOUNTER DISHWASHER

### STEP 1

#### Take Apart

Open the door and remove the dishrack (if there is one in the unit).

Remove the strainer pan

Remove the overflow pipe

### STEP 2

#### Run a clean cycle

Close the door and **press the drain cycle button once**

The **Clean message CLE** will be displayed throughout the drain cycle (which runs approximately for 3 minutes)

The word **End** will display when the cycle is over and the machine will beep. **You can now open the door and press the off button**

### STEP 3

#### Take apart

Turn counter clockwise to remove the pump filter

Unscrew the lower rinse arm. Lift the wash arm. Remove both and clean.

### STEP 4

#### Take apart

Unscrew the upper rinse arm. Pull the wash arm. Remove both and clean.

### STEP 5

#### Take apart

Remove centre support. Clean both sides.

Remove front support (located beneath the bottom edge of the door). Clean well both sides.

Turn the ring gasket on the centre post counter clockwise to remove. Clean it.

### STEP 6

#### Manual cleaning

If not done already, clean and wash all removed parts. You are now ready to reassemble.

### STEP 7

#### Reassemble

Put back ring gasket turning clockwise to lock position.

Put back the centre support.

Tighten the upper rinse arm gently.

Tighten the lower rinse arm gently.

Put back the overflow pipe.

Put back the front support.

Put back the upper wash and rinse arms.

Put back the lower wash and rinse arms.

Put back the pump filter turning clockwise to lock position.

Put back the strainer pan.

Now the unit is ready to operate or to switch off.
